

PROGRESS UPDATE | SPRINT 2 | APRIL 24 – MAY 3

$$\text{SPRINT 2} = (4/4) * 100 = 100\%$$

$$\text{PROJECT PERCENTAGE COMPLETION} = (2 / 7) * 100 \% = 28.57\%$$

This sprint focuses on the system's architecture, planning, and design, and the APIs endpoint we will use to create its functionality, and what request parameter we will use to store the information.

SPRINT RETROSPECTIVE

What went well: The task UI/UX designing, because we helped each other and gave feedback on each of the design

What could be improved: The UI/UX design

What needs to be done: Based on the next sprint, it's the development process. The front end needs to be developed, the database should be implemented, and OTP and SMS integration.
