## SPRINT 6

Focuses on building secure and reliable backend infrastructure to support critical fund transfer operations and enhance API security within the system.

**What went well:** We managed to go back on track and complete almost all the tasks that we needed to do.

**What could be improved:** The UI/UX and the design when confirming the transaction is processed.

**What needs to be done:** Fix all the bug issues. check the data transmission, implement the Transfer External and the SMS integration.
