SPRINT 4

Begin functional implementation based on the use case diagram and functionalities of the bank system — actual development work is taking place.

SPRINT RETROSPECTIVE

What went well: We manage to convert our all initial mock ups on figma into front end design and connect all the wireframing.

What could be improved: Still Our task compliance, I manage a way on how can we go back on track. By committing a 2/3 hours every day in the project.

What needs to be done: Develop all the use case diagram, Registration and login, Transfer fund internal and external, History View, Display the balance on dashboard
